PROJECTS

Delivery Estimation (*NodeJS, Javascript*) I created a tool to provide a confidence table on how many sprints a Project/Epic will run based on data from past sprints using Montecarlo. [Click to see project](#)

MovieDB UI (*Angular, Typescript, Git, CSS, HTML, Docker*) Built a project for an alternative UI for [TheMovieDB](#) to showcase my skills. [Click to see project.](#)

Industrial System (*Java, Hibernate, Liquibase, SpringBoot, Angular*) This was a project created under my time at Codi. It was a SaaS Manufacturing Execution System targeted at small companies. Designed the System Architecture and wrote the base/core projects for APIs and UI. [Click to see project.](#)
